

CREATIVE *Portfolio*

by Alliah Aurin

About me

Hi! my name is Alliah and I specialize in creating variety of design projects and content making, including social media posts, advertisements, and art covers or posters. My work focuses on blending creativity with functionality to deliver visually impactful designs and bringing creativity in captioning and writing work. I am passionate about bringing ideas to life through compelling visuals that connect with audiences.

LOGO AND BANNER

A promotional banner for Life Saver Vault. The text reads: "Prepare for the unexpected with Life Saver Vault" and "where peace of mind meets medical preparedness." Below this is a "Get LifeSaver" button. To the right is a circular inset showing a first aid kit and medical supplies. The URL "lifesavervault.com" is on the far right.

Prepare for the unexpected with
Life Saver Vault

where peace of mind meets medical preparedness.

Get LifeSaver

lifesavervault.com

A banner for Elite Pain Management Physicians. The text reads: "Elite Pain Management Physicians" and "Experience Personalized, Expert Care Without the Hassle".

Elite Pain Management Physicians

Experience Personalized, Expert Care Without the Hassle

Here is a selection of my recent creative projects, showcasing highlights from my recent work.

CARDS, PRICELIST, FLYERS

POSSIBLE FILLER COMPLICATIONS

With any procedure, nothing is ever 100% risk free.

Although these risks and complications are extremely rare, they can still happen. If you experience ANY of the following in red at all, please do NOT hesitate to contact us as soon as possible so that we may resolve any potential issues. Time is of the essence here:

- Any white areas or patches
- Coldness in the area
- Numbness/Tingling in the area
- Pain in the area
- Rashes on the face

The above 2 pictures are examples of when an artery has been compressed or blocked by filler and it is not able to carry the blood supply around the face. This is called a "vascular occlusion" and can become very serious if left untreated.

The 3 pictures below are examples of bruising in the lips during & after the procedure. It is possible the bruising may be worse a day or two later.
This is normal.

Bruising can take up to 14 days (sometimes longer) to fully heal. Please be patient. As long as the bruising is not severe enough to cause any numbness/loss of function or does not appear [mainly white patches], please do not worry.

YOUR LIP FILLER JOURNEY

DAY 1

My lips are thin, I want to look full!

DAYS 1-3

Omg, my lips are huge & swollen! What have I done??

DAYS 1-7

I've got a bruise and some lumps, is that normal?

DAYS 7-14

Lips healing well. Lumps gone, Bruising pretty much gone and lips feel nice & soft.

WEEKS 2-3

Omg! my new lips

AFTER 2-4 WEEKS

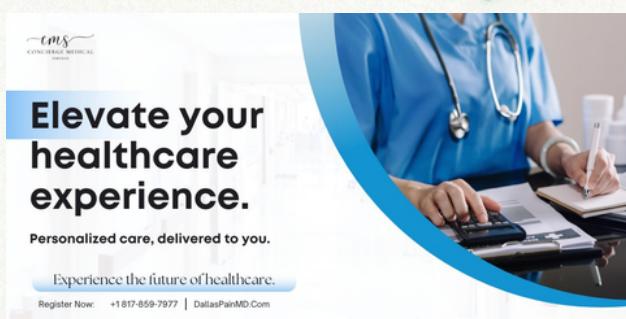

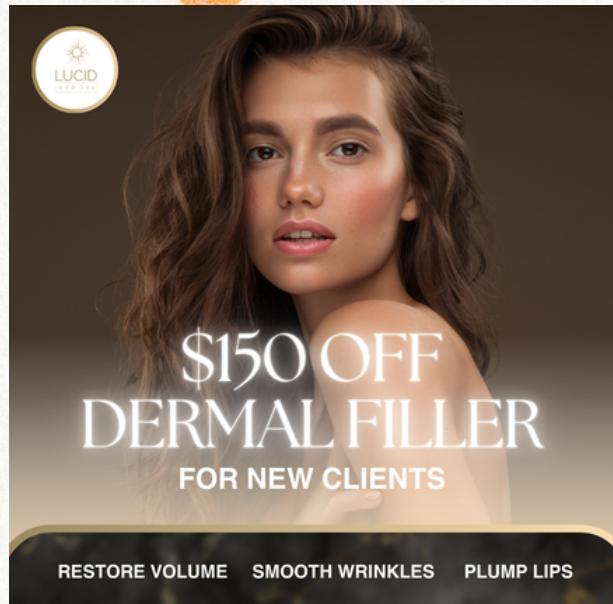

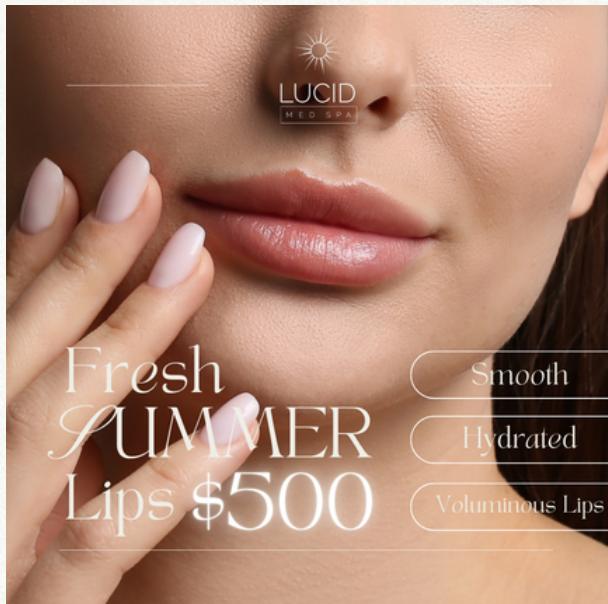

I miss the swelling! I want some more filler!
